

## **YCT-1724** **Scale and Corrosion Inhibitor**

### **PRODUCT DESCRIPTION**

**YCT-1724** is a patented, hydrolytically stable, Non-Ionic dispersant. It is highly effective across a wide pH band and temperature range, indisposing oil silt, sludge, clay and dread micro-organisms in cooling water systems. This anti foulant will remove deposits both organic and Inorganic, which if left in place would reduce heat transfer and lead to under deposit corrosion.

### **TYPICAL PROPERTIES**

Appearance and odour	:	Clear, dark brown liquid
Specific Gravity	:	1.1
pH	:	Less than 6
Solubility in water	:	Complete

### **APPLICATION**

**YCT-1724** is corrosive to most metals and therefore stainless steel or acid resistant engineering plastics should be used for dosing pumps and dosing lines. Preferably the product tower pumps suction as possible.

The local sed-chemic representative will be arrange for a full system survey and water analysis, and provide advice accordingly.

### **SAFETY PRECAUTION**

Gloves and goggles must be worn when handling the concentrated solution. Avoid contact with eyes, skin and clothing, Splashes and spills should be washed away immediately using large quantities of cold water.

### **PACKAGING**

**YCT-1724** is available in 30 Kg drum.
